MEMORANDUM FOR RECORD

SUBJECT: AGC/AP-TECH ADAS System Windshields

AGC Automotive Americas Co. (“AGC”) hereby confirms that windshields we produce at your request for vehicles with ADAS systems for aftermarket installation will be suitable for the physical and technical purpose of that windshield for that particular vehicle and should present no more risk relative to the ADAS function of the windshield than the windshields provided for such vehicle with an OEM logo’d part; provided, AGC assumes no responsibility or liability related to the proper fit of the windshield(s), the required calibration of the ADAS system’s functions, or any defects, malfunctions or errors or other liabilities or risks associated with or caused from installation or improper use of that windshield in the application in which it is installed. Further, if you modify or change the design or functionality of the windshield related to or which could impact the windshield’s interface with or performance of the ADAS system in that vehicle, AGC will not assume any liability or responsibility related to that windshield or its performance with the ADAS system in which the vehicle is installed unless specifically agreed to in writing by AGC for that particular design or specification.
